

# People's Power Station

We're mapping renewable generation and energy efficiency projects across Oxfordshire – add your site to the People's Power Station and show how together we're consigning fossil fuels to history.

Projects mapped to date include:

280 renewable energy installations.

- null
- Air Source Heat
- CHP
- Solar Thermal
- Solar PV
- Heat Pumps
- Hydro
- Wind

96 energy efficiency projects

Together they are meeting 54,375 people's share of Oxfordshire's energy needs

This is just part of the story – Oxfordshire is generating more than 384GWh green energy a year.

Eynsham pv installation on People's Power Station website- but we know there are many more!

**Have you installed pv on your home?**

Over 100 households in Eynsham have solar panels on their homes. GreenTEA would encourage all those with domestic renewable installations to add them to the People's Power Station site:– this will show how much we are doing together
